

Pickleball Central Hub — Project Infrastructure Summary

Last updated: 2026-04-30T23:08:15.660Z

Purpose

This is the operational knowledge base for links, services, and servers used to maintain, test, build, and deploy the Pickleball Central Hub (Open Play, League Play, admin tools, shared Firebase).

Core Paths

- Project root: repository root (this standalone repo)
- Deploy source (Firebase Hosting public): `live`
- Firebase rules file: `database.rules.json`
- Runtime mode file: `openplay-mode.json` (repo root)

Public Web Links

Surface	URL
Account	https://southend-pickleball-central.web.app/open-play/account
RSVP	https://southend-pickleball-central.web.app/rsvp
Session Check-in	https://southend-pickleball-central.web.app/checkin
Admin Activity	https://southend-pickleball-central.web.app/admin/activity
Alternate Hosting Domain Pattern	https://pickleball-advanced-open-play.firebaseio.com/...

Cloud Services In Use

Service	Purpose	Endpoint / Reference
Firebase Hosting	Serves production static app from <code>live/</code>	https://southend-pickleball-central.web.app (primary); legacy hostname redirects
Firebase Authentication	Account sign-up/sign-in/password reset	authDomain: <code>pickleball-advanced-open-play.firebaseio.com</code>
Firebase Realtime Database	RSVP, profiles, admin UIDs, activity feed	databaseURL: https://pickleball-advanced-open-play-default-rtdb.firebaseio.com
Firebase Web SDK (compat v10.7.1)	Client SDK loaded at runtime	https://www.gstatic.com/firebasejs/10.7.1/
Google Fonts	UI typography	https://fonts.googleapis.com
cdnjs QRCodeJS	QR code rendering in RSVP page	https://cdnjs.cloudflare.com/ajax/libs/qrcodejs/1.0.0/qrcode.min.js

Service	Purpose	Endpoint / Reference
FormSubmit	Email relay used by RSVP flow	https://formsubmit.co
Zelle QR enrollment link	Payments shortcut surfaced in RSVP page	https://enroll.zellepay.com

Firestore Project Snapshot

- projectId: `pickleball-advanced-open-play`
- authDomain: `pickleball-advanced-open-play.firebaseio.com`
- databaseURL: `https://pickleball-advanced-open-play-default-rtdb.firebaseio.com`
- openplay-mode activeTree: `staging`
- openplay-mode allowProductionHostingDeploy: `false`

Realtime Database Namespaces

- `openplay_se/rsvps`
- `openplay_se/admin_uids`
- `openplay_se/admin_scope`
- `openplay_se/module_access`
- `openplay_se/user_profiles`
- `openplay_se/users`
- `openplay_se/activity`
- `openplay_se/board_messages`
- `openplay_se/board_profiles`
- `openplay_se/league_account`
- `openplay_se/league_directory`
- `openplay_se/league_invites`
- `openplay_se/user_notifications`
- `openplay_se/league_teams`
- `openplay_se/league_games`

Local and Maintenance Servers

Server	How to Run	URL
Local hub QA	<code>npm run local-test</code>	http://127.0.0.1:3456/testing/local-page/index.html
Local website dev server	<code>npm run start</code> or <code>npm run dev</code>	http://127.0.0.1:3000/
Static local server	<code>npm run serve</code>	http://127.0.0.1:3000/

Build / Deploy / Workflow Commands

- `npm run local-test -> npx live-server --port=3456 --open=/testing/local-page/index.html`
- `npm run local-test:sync -> node testing/scripts/local-test.js`
- `npm run deploy:openplay -> node scripts/openplay-deploy.js --only hosting`
- `npm run deploy:openplay:all -> node scripts/openplay-deploy.js --only hosting,database`
- `npm run firebase:deploy-rules -> npx firebase-tools deploy --only database --non-interactive`
- `npm run openplay:promote -> node scripts/openplay-promote-staging-to-live.js`

- `npm run openplay:bootstrap-staging -> node scripts/openplay-bootstrap-staging.js`
- `npm run openplay:sync-from-live -> node scripts/openplay-sync-from-live.js`
- `npm run openplay:use-staging -> node scripts/openplay-switch-tree.js staging`
- `npm run openplay:use-live -> node scripts/openplay-switch-tree.js live`
- `npm run test -> node --test testing/unit/test-openplay-rsvp.js testing/unit/test-firebase-rules.js testing/unit/test-rating-eligibility.js testing/unit/test-roll-live.js`

Key Project Surfaces to Maintain

- `live/` -> production source of truth for Hosting deploy output.
- `staging/` -> development tree for iterative edits before promotion.
- `scripts/openplay-deploy.js` -> deploy guard enforcing active tree and production deploy lock.
- `testing/scripts/local-test.js` -> mirrors active tree into local test hubs.
- `live/js/openplay-firebase-config.js` -> Firebase project wiring used by runtime.
- `live/js/south-end-openplay-sync.js` -> auth/database sync and shared client logic.
- `database.rules.json` -> Realtime Database read/write rules.

Update Behavior

This document and its PDF are auto-generated by `npm run summarize`.

- First run: creates knowledge base/OPENPLAY_PROJECT_SUMMARY.md and knowledge base/OPENPLAY_PROJECT_SUMMARY.pdf
- Later runs: overwrite both files with the latest snapshot
